It seems that certain mathematicians took this literary challenge literally, and Fadiman follows it with an excerpt from "Ingenious Mathematical Problems and Methods," by L. A. Graham, who had evidently posed the problem in a mathematics journal. Graham gives a solution by William W. Johnson of Cleveland for the general case of unequal circles.

Mrs. Miniver's problem - Wikipedia

An unusual problem book that focuses on the method of solution, this collection spotlights 52 of the finest challenges from the popular columns of the Graham Dial. Each problem features several approaches to the solution of situations involving measurement of geometrical spaces, probabilities, distances, number systems other than the decimal, relative motion, and other areas.
