The MAX038 is a high-frequency function generator that produces low-distortion sine, triangle, sawtooth, or square (pulse) waveforms at frequencies from less than 1Hz to 20MHz or more, using a minimum of external components. Frequency and duty cycle can be independently controlled by programming the current, voltage, or resistance.

I followed your links, but it seems that the only vendor is "Maxim Integrated Products". Is there any other company that produces MAX038 or its alternative?

Bookmark File PDF Maxim Max038 User Guide

Not like most of the electronic components, which always have more than one manufacture, Max038 seems very unique and only has one vendor which is Maxim Integrated Products.
