SYSTEM OPERATION IN-SERVICE GUIDE DSD EDGE - Medivators

The DSD EDGE™ features two fully-independent and asynchronous reprocessing basins designed for use in busy endoscopy facilities. The DSD EDGE provides the fastest endoscope turn-around time with a reprocessing cycle as short as 25 minutes. Improving endoscope throughput allows additional patient procedures to be scheduled which can reduce endoscope inventory, decreases the number of AERs needed, and result in increased facility revenue.

If you are performing a PM on a DSD-201 or a DSD Edge it is important to flush the unit. You will also need access to the main water inlet shutoff valve to stop incoming water before draining the 0.2 micron filter housing. Lastly, always unplug the unit prior to removing any components.
