1. Anger. When you do not get what you want, your subconscious mind reacts with the feeling of anger in an attempt to force things to go your way. Thus, anger creates an illusion that you can take control of the situation. Anger helps us get the upper hand in the conflict and even protect our rights. This negative emotion is an unconscious attempt to get your opponent to back down in an argument.

negative emotion neutralizer - Bing - Free PDF Blog.

Likewise, two distinct types of negative emotion—fear and anger—each produce a narrower thought-action repertoire than does a neutral state. This pattern of results supports a core proposition of the broaden-and-build theory: that distinct positive emotions widen the array of thoughts and actions that come to mind.
