Neuropsychiatric And Cognitive Changes In

Psychiatric and cognitive changes are common in patients with Parkinson's disease and have key clinical consequences but, despite this, these symptoms are often under-diagnosed and under-treated, leading to increased morbidity and costs. With chapters focused on the major neuropsychiatric...

Neuropsychiatric and Cognitive Changes in Parkinson's ...

With chapters focused on the major neuropsychiatric features, Neuropsychiatric and Cognitive Changes in Parkinson's Disease and Related Movement Disorders rectifies this deficit. Written by experts in the field, with a consistent focus on relevant clinical knowledge, it provides a comprehensive overview including all the major behavioral changes associated with movement disorders.

Neuropsychiatric and Cognitive Changes in Parkinson's ...

Conclusion Neuropsychiatric disorders in patients and their families are associated with cognitive and behavioural changes post-MND diagnosis, with many occurring independently of MND-FTD and C9orf72 status. These findings support an overlap between MND, frontotemporal dementia and neuropsychiatric disorders, particularly mood disorders.

Relationship between neuropsychiatric disorders and ...

Cognitive neuropsychiatry is a growing multidisciplinary field arising out of cognitive psychology and neuropsychiatry that aims to understand mental illness and psychopathology in terms of models of normal psychological function. A concern with the neural substrates of impaired cognitive mechanisms links cognitive neuropsychiatry to the basic neuroscience. Alternatively, CNP provides a way of uncovering normal psychological processes by studying the effects of their change or impairment. The te

Cognitive neuropsychiatry - Wikipedia

CONCLUSION: Neuropsychiatric disorders in patients and their families are associated with cognitive and behavioural changes post-MND diagnosis, with many occurring independently of MND-FTD and C9orf72 status. These findings support an overlap between MND, frontotemporal dementia and neuropsychiatric disorders, particularly mood disorders.
