### Shared Services In Finance And Accounting

"A shared service is a collaborative strategy in which a subset of existing business functions are concentrated into a new, semi-autonomous business unit that has a management structure designed to promote efficiency, value generation, cost savings and improved service for internal customers of the parent organisation, like a business competing in the open market" (Bergeron, 2003).

### Shared Services - What is it? Definition, Examples and More

Shared Services refers to a group of centralized, non-revenue-generating operations that support multiple divisions, or lines of business, of the company. This centralization (i.e., employees grouped in a single, central location) of support services allows these resources to be "shared" across the organization, and are typically associated with lower costs, higher productivity and increased standardization of work processes and outputs. .
