Thorne: Speculations About the Future What we might expect to discover about general relativity and its interface with quantum theory in the new century. Igor Novikov: Can We Change the Past?

The Future of Spacetime (Audiobook) by Richard H. Price ...

In the Schwarzschild solution the spacelike singularity is in the future of events inside the event horizon: here it's in the future of the "whole universe". But it's exactly the same idea. The future of anything that happens—or any geodesic—inevitably winds up in the "dead end" of the causal graph, at which "time stops".
