The God Particle, subtitled "If the Universe is the answer, what's the question?", entertained me. More: it told me things I didn't know, mostly about the history of science. The book is framed as a search for the indivisible particle, and it begins with Democritus of Abdera, who first came up with the idea that the universe was made of a-toms.

...

The God Particle: If the Universe Is the Answer, What Is the Question? is a 1993 popular science book by Nobel Prize-winning physicist Leon M. Lederman and science writer Dick Teresi. The book provides a brief history of particle physics, starting with the Pre-Socratic Greek philosopher Democritus, and continuing through Isaac Newton, Roger J. Boscovich, Michael Faraday, and Ernest Rutherford and quantum physics in the 20th century.

The God Particle is a pretty complete narrative of man's effort to answer the question of what is the ultimate stuff. His task in telling the oft told tale, he says, is much like being Zsa Zsa Gabor's seventh husband: he knows what to do, but how does he make it interesting?

Answer: The "God particle" is the nickname of a subatomic particle called the Higgs boson. In layman's terms, different subatomic particles are responsible for giving matter different properties. One of the most mysterious and important properties is mass. Some particles, like protons and neutrons, have mass.

...

The Higgs boson is an elementary particle in the Standard Model of particle physics, produced by the quantum excitation of the Higgs field, one of the fields in particle physics theory. It is named after physicist Peter Higgs, who in 1964, along with five other scientists, proposed the Higgs mechanism to explain why particles have mass. This mechanism implies the existence of the Higgs boson.

Higgs boson - Wikipedia

The God Particle Physicists have said that the God Particle has all but been proven to exist. It's like seeing a footprint in the sand without seeing the foot that left it. This subatomic particle, the so-called God Particle, is understood to be what gives all matter in the universe its size and its shape.

God Particle Found: What is the Significance?

The God particle or Higgs boson particle in the Dark series appears to be a throbbing mass of black tar and inner blue light until a power source, similar to Tesla coil, is used to stabilize it creating a stable wormhole or portal through which time travel can occur to any desired date breaking the 33-year cycle. There are two known god particles.
