### 1988 Corvette Engine

In 1988, the L98 was tweaked for the last time on the Corvette. Modified aluminum cylinder heads were inserted onto the engine, which allowed the engine to breathe better, and the camshaft was revised. The modifications boosted horsepower by 5. The revised L98 had an output rating of 245 at 4,000 rpm and the torque remained the same.

### Corvette L98 Engine Specs | It Still Runs

For 1982 and 1984, Corvette buyers had no drivetrain options, it was the 350 cubic-inch Crossfire Injection engine (RPO L83). The Crossfire induction system was also available on 1982 and 1983 Z28 Camaros, but only on the 305 cubic-inch motor (LU-5). In the Camaro, the Crossfire motor gave 20 more horsepower over the carbureted 305 engine.

### Corvette Crossfire Engine - Restore An Old Car

The resulting engine produced 370 horsepower at 6,000 rpm and 380 ft-lb of torque at 4000 rpm. The LT1 could only be ordered with a four-speed manual transmission. When equipped, the Corvette was capable of running a quarter mile from a standing start in approximately 14.2 seconds at a speed of 102 miles per hour.

### C4 Corvettes For Sale: 1984 - 1996 - Page 1 of Corvette search

1966 Corvette Overview. With the 1966 Corvette arriving after General Motors' recent, overwhelming success with the 427 Sting Ray, there was no question that the newest Corvette model would continue to feature big-block engines.. This turnabout in events was rather interesting, especially given GM management's earlier decree that no car line smaller than a full-size model would carry an ...
