serious issues that can happen to your Acura TSX's engine is if it ends up with low oil

pressure. Low oil pressure will cause the engine to seize up.

When the oil pressure light on, it should be assumed that the engine locking up is imminent. We advise not running the engine until the issue can be properly diagnosed.

Low Oil Pressure
Causes: Acura TSX.

Manual

been related to first generation models, most notably the 2004 model. There's very little that I've found related to the second generation TSX. I've also noticed that Honda (and Acura) maintain that anything under one quart burn off per 1000 miles is acceptable.

no oil level light. Your car have no oil level light! Your have a oil pressure light, the oil pressure light should not be coming on any time the engine is running. If it comes on, you either have a faulty oil pressure switch/wiring or major problem with your engine. In your case, I bet it is the switch/wiring.
