Two Stroke Engines Are So Simple!

A two stroke engine should use a mix of gasoline and two stroke engine oil in the fuel tank, so if kept unused the mix would get stale/solid when cold/unused for a long time as opposed to only gasoline (these days gasoline is mixed with ethanol, so it also gets bad when unused for a long time, but less so).

Why do 2 stroke engines require more maintenance than 4 ...

More specifically, the number of strokes that are required of the piston. For example, in order for a 2-stroke engine to complete the entire combustion cycle, consisting of five functions (intake, compression, ignition, combustion, and exhaust), this entire cycle is completed after two piston strokes. In comparison, a 4-stroke engine's cycle is completed after four strokes of the piston — or one crankshaft revolution vs two crankshaft revolutions respectively.

2-Stroke vs 4-Stroke - Which Is Better and What's the ...

The other key difference is that 4-stroke engines use engine oil and require oil changes, whereas 2-strokes do not have a load of oil inside but instead they mix in a little special 2-stroke oil in with the gas which then lubricates the engine as the air/fuel mix flows through the engine.
