Engineering is the application of knowledge in the form of science, mathematics, and empirical evidence, to the innovation, design, construction, operation, and maintenance of structures, machines, materials, devices, systems, processes, and organizations. Engineering is a vast discipline to study and there is a huge number of students entering into this stream every year.

Chemistry is the scientific study of the properties and behavior of matter. It is a natural science that covers the elements that make up matter to the compounds composed of atoms, molecules and ions: their composition, structure, properties, behavior and the changes they undergo during a reaction with other substances.. In the scope of its subject, chemistry occupies
