Whether Algebra 1 or Algebra 2 is harder depends on the student. For example, the shock of dealing with variables for the first time can make Algebra 1 very hard until you get used to it. On the other hand, Algebra 2 is often considered harder because of its advanced concepts such as logarithms and imaginary numbers. Is Algebra really that hard?

This short course tests a student's readiness for EMF courses 10-14, which focus on Abstract Algebra. Students who complete the first nine EMF courses should use this supplement to review the important ideas covered in those courses as these ideas provide the mathematical tools necessary to master the EMF Abstract Algebra courses.

EMF Math - About EMF

You've learned one way to graph a standard form equation - by converting it to slope intercept form. Click here to review this lesson. There is another way to graph standard form equations, and that is to find the x and y intercepts. Now let's review what the term intercepts means. An intercept is where your line crosses an axis.

Using the X and Y Intercepts to Graph Standard Form Equations

Keeping a reference sheet of formulas is a great way to study Algebra. Slope is a very important concept to remember in Algebra, so make sure you add these formulas and definitions to your reference sheet or study guide.

Remember, in equations of this form the value of that one variable is constant; it does not depend on the value of the other variable. Equations of this form have graphs that are vertical or horizontal lines. In equations #3 and #4, both x and y are on the same side of the equation. These two equations are of the form $Ax + By = C$. $Ax + By = C$.
