Finite Automata (FA) is the simplest machine to recognize patterns. The finite automata or finite state machine is an abstract machine that has five elements or tuples.

set of grammar rules is a quadruple (N, T, P, S)

where. N is a set of non-terminal symbols.. T is a set of terminals

where $N \cap T = \text{NULL}$.. P

is a set of rules, $P: N \rightarrow (N \cup T)^*$, i.e., the left-hand side of the

production rule P does not have any right context or left context.. S is the start symbol.

INTRODUCTION TO
FINITE AUTOMATA

1.1: introduction to
finite automata In this
chapter we are going
to study a class of
machines called finite
automata. Finite
automata are
computing devices that
accept/recognize
regular languages and
are used to model
operations of many
