Ch 19 - Viruses.wmv

BIOLOGY I: Chapter 19 - Viruses Evelyn I. Milian - Instructor 5 Host Range and Specificity of Viruses The host range is the limited range (spectrum) of host organisms that each type of virus can infect and parasitize. All types of organisms (animals, plants, protists, fungi, bacteria) can be infected by viruses.

Chapter 19: VIRUSES

Viruses, as exceptional entities, can contain either DNA or RNA as heritable genetic material. Both positive and negative control mechanisms regulate gene expression in bacteria and viruses. The processes of transcription, mRNA processing and translation are imperfect, and errors can occur and may, in certain cases, alter phenotypes.
