There is absolutely no specification that we would have to purchase a 113us access code to get access to the answers to the quizzes at the end of each chapter. Also, the access code is only valid for 2 terms meaning 1 year. I wish we would have bought the 10th edition where the answers are at the end of the book and that edition is equally cheaper.

A monocot plant embryo consists of only one cotyledon. The cotyledon is termed as scutellum in the grass family. Root cap of grass is covered with an undifferentiated sheath which is called as coleorhiza. A portion of the embryonic axis, which is located above the scutellum is called epicotyl. Epicotyl consists of shoot apex and coleoptiles.
