Even the canonical “Out of Africa” migration itself has turned out to be less neat and tidy than we thought. Outside Africa, whether you are an indigenous Australian, Amazonian native or a German burgher, fully 90-99% of your ancestry derives from a single ancestral human population pulse 60,000 years

Evolutionary Relationships . The earliest Homo erectus were contemporaries of the late Homo habilis in East Africa for several hundred thousand years. This suggests that the immediate ancestor of Homo erectus was an early Homo habilis or possibly another yet to be discovered species of early humans. Homo erectus was a very successful human species,
