Atlas Of Gynecologic Surgery Including

White adipose tissue, once regarded as morphologically and functionally bland, is now recognized to be dynamic, plastic and heterogenous, and is involved in a wide array of biological processes including energy homeostasis, glucose and lipid handling, blood pressure control and host defence 1.High-fat feeding and other metabolic stressors cause marked changes in adipose morphology, physiology ...

A single-cell atlas of human and mouse white adipose tissue

For epithelial ovarian cancer, surgery has 2 main goals: staging and debulking. If your cancer isn't properly staged and debulked, you may need to have more surgery later, so it's important that this surgery is done by a specialist who's trained and experienced in ovarian cancer surgery, like a gynecologic oncologist.

What is laparoscopy? Laparoscopy is a procedure a doctor uses to look inside the abdomen (belly) and pelvis. This is done with a laparoscope, a thin, flexible tube with a light and a small video camera on the end.The tube is put in a small cut made through the abdominal wall near the navel (belly button).

Laparoscopy | What is Laparoscopic Surgery?

Laparoscopy (from Ancient Greek λαπάρα (lapara) "flank, side", and σκοπέω (skopeo) 'to see') is an operation performed in the abdomen or pelvis using small incisions (usually 0.5–1.5 cm) with the aid of a camera. The laparoscope aids diagnosis or therapeutic interventions with a few small cuts in the abdomen. Laparoscopic surgery, also called minimally invasive surgery (MIS ...
