A beekeeper (or apiarist) keeps bees in order to collect their honey and other products that the hive produce (including beeswax, propolis, flower pollen, bee pollen, and royal jelly ), to pollinate crops, or to produce bees for sale to other beekeepers. A location where bees are kept is called an apiary or "bee yard".

### **Beekeeping - Wikipedia**

Start beekeeping projects in the autumn. Bees' behavior is entirely dependent on climate. Use the fall and winter to consult books on beekeeping, gather your supplies to build the hive, and find a source for your bees. Introduce your bees to the hive only in the spring as the early flowers appear.
