Beanium Lab Answers

Lab: Half Life of Pennium Background: Some naturally occurring isotopes of elements are not stable. They slowly decompose by discarding part of the nucleus. The isotope is said to be radioactive. This nuclear decomposition is called nuclear decay. The length of time required for half of the isotope to decay is the substance's half-life.

Histogram Lab Activity. The HISTOGRAM is the way to make a graph showing the distribution of a single quantitative variable. It is made by dividing the x-axis into equal-sized "bins" and tallying the numbers of observations of the variable that fall into each bin. Frequency is always on the y-axis of a histogram and the x-axis is in units of the variable measured.
