SKM Air Handling Units are designed to a high engineering standard to provide the requirements of ventilation, heating, cooling, dehumidification and air distribution to a conditioned space. Units are manufactured in a facility registered to ISO 9001:2008 manufacturing quality standards.

Air Handling Units - S.K.M Air Conditioning LLC

An air handler, or air handling unit (often abbreviated to AHU), is a device used to regulate and circulate air as part of a heating, ventilating, and air-conditioning system. An air handler is usually a large metal box containing a blower, heating or cooling elements, filter racks or chambers, sound attenuators, and dampers. Air handlers usually connect to a ductwork ventilation system that ...

Air handler - Wikipedia

modular air handling unit. Each function is placed into an air handling unit casing consisting of one or more modules. It is available in 12 sizes with airflows from 750 to 48,000 m³/h (0.2-13.3 m³/s). Geniox units are designed in SystemairCAD, a design program which ensures an optimal dimensioning of the unit's functions.
