Competing with the Soviets: Science, Technology, and the ...

Based on the assumption that scientists are participants in the culture in which they live, *Competing with the Soviets* looks beyond the debate about whether military influence distorted science in the Cold War. Scientists' choices and opportunities have always been shaped by the ideological assumptions, political mandates, and social mores of their times.

Competing with the Soviet Union meant leading the world in science and technology, and it also meant using science to win the hearts and minds of the world. Not only were there space races and arms races, there were also struggles to combat poverty and efforts to develop American visions of economic change to rival the ones set forth by Karl Marx.

Competing with the Soviets - Audra J. Wolfe

My first book, *Competing with the Soviets: Science, Technology, and the State in Cold War America* (2013), explored the power of science and technology as "stuff": weapons, rockets, labs, and so on. Since then, my research has moved into the fascinating and disturbing topic of propaganda and psychological warfare.
