The subset sum problem (SSP) is a decision problem in computer science. In its most general formulation, there is a multiset of integers and a target-sum, and the question is to decide whether any subset of the integers sum to precisely. The problem is known to be NP-complete. Moreover, some restricted variants of it are NP-complete too, for example: ...

In computer science, a sorting algorithm is an algorithm that puts elements of a list into an order. The most frequently used orders are numerical order and lexicographical order, and either ascending or descending. Efficient sorting is important for optimizing the efficiency of other algorithms (such as search and
