Electrolux Ice Maker Problems
A failing compressor, bad condenser fan motor or faulty drain pump can cause loud noise from the ice maker. If the compressor is making a loud noise, a service technician should repair the ice maker because a compressor repair involves the recovery and recharge of the refrigerant, which is tightly regulated by the Environmental Protection Agency (EPA).

Common ice maker problems - making noise | Symptom diagnosis
Unplug the ice maker and shut off the ice maker's water supply. Disconnect the water supply line and place the end of the supply line in a container. Briefly turn on the water supply and check water flow through the supply line. If water flow through the supply line is weak, have a plumber fix the water supply going to the ice maker.

Electrolux Gallery Dishwasher model - ESi6180U Hi, I've accidentally pressed hour delay (11) instead of my usual programme 11. When I tried to clear it by pressing the program button for 5 seconds it didn't reset to the clear dashes, I've tried that 3 times then 10 seconds, 20 seconds, turning it off and on again - it's still flashing H with the steady 11 next to it.

Electrolux Dishwasher Error Codes - How To Clear - What To ...
For grossly over filling ice makers (cubes all lumped together in the tray) or for major over filling problems, see the water leaking section. This is where the module style water adjustment is Turning the set screw clockwise decreases the water fill. 1/2 turn = approx 20cc of water.
