Elements of Knowledge: Pragmatism, Logic, and Inquiry

...

This article explicates pragmatism as a relevant and useful paradigm for qualitative research on organizational processes. The article focuses on three core methodological principles that underlie a pragmatic approach to inquiry: (1) an emphasis on actionable knowledge, (2) recognition of the interconnectedness between experience, knowing and acting and (3) inquiry as an experiential process.

Abductive reasoning (also called abduction, abductive inference, or retrodution) is a form of logical inference formulated and advanced by American philosopher Charles Sanders Peirce beginning in the last third of the 19th century. It starts with an observation or set of observations and then seeks to find the simplest and most likely conclusion from the observations.

Pragmatism is a philosophical tradition that considers words and
thought as tools and instruments for prediction, problem solving,
and action, and rejects the idea that the function of thought is to
describe, represent, or mirror reality. Pragmatists contend that
most philosophical topics—such as the nature of knowledge,
language, concepts, meaning, belief, and science—are all best
