James Robertson (1911-1988) was a psychiatric social worker and psychoanalyst based at the Tavistock Clinic and Institute, London from 1948 until 1976.. John Bowlby said of him, "(He) was a remarkable person who achieved great things. His sensitive observations and brilliant observations made history, and the courage with which he disseminated - often in the face of ignorant and prejudiced ...

James Robertson (psychoanalyst) - Wikipedia

Stress, either physiological, biological, or psychological is an organism's response to a stressor such as an environmental condition. Stress is the body's method of reacting to a condition such as a threat, challenge or physical and psychological barrier. Stimuli that alter an organism's environment are responded to by multiple systems in the body. In humans and most mammals, the autonomic ...
