Ending Cholera A Global Roadmap

Ending Cholera—A Global Roadmap to 2030 operationalises the new global strategy for cholera control at the country level and provides a concrete path toward a world in which cholera is no longer a threat to public health. By implementing the strategy between now and 2030, the Global Task Force on Cholera Control (GTFCC) partners will support countries to reduce cholera deaths by 90 percent.

WHO | Ending Cholera

CDC works with global partners to detect cholera early, respond quickly, and prevent large-scale, uncontrolled outbreaks of this devastating illness. Response: In October 2017, the Global Task Force on Cholera Control launched Ending Cholera: The Global Roadmap to 2030 – a bold, unified approach to cholera prevention and control. This comprehensive plan integrates evidence-based best practices and identifies priorities to reduce cholera deaths by 90% by 2030.
