Engine Toyota

Toyota has produced a wide variety of automobile engines, including inline-four and V6 engines. The company follows a simple naming system for their modern engines: The first numeric characters specify the engine block's generation The next one or two letters specify the engine family

List of Toyota engines - Wikipedia

The A Series engines are a family of inline-four internal combustion engines with displacement from 1.3 L to 1.8 L produced by Toyota Motor Corporation. The series has cast iron engine blocks and aluminum cylinder heads. To make the engine as short as possible, the cylinders are siamesed. The 1A engine was only 550 mm (21.6 in) long. The development of the series began in the late 1970s, when ...

Toyota A engine - Wikipedia

Toyota uses the first digit in their engine designations to indicate the engine's generation. For example, the old 4A-FE was the fourth generation A engine. The 1ZZ-FE is the first generation ZZ engine. However... the 1JZ and 2JZ were separated by a single year and were made simultaneously.
