CD39 and CD73 shape the "purinergic halo" surrounding immune cells. The occurrence of pathological events, such as inflammation, promotes a massive accumulation of ATP, which serves as a key "danger" signal, triggering a series of proinflammatory responses (a).However, negative feedback also takes part in this context because the increased ATP secretion, as observed in the early phase ...

CD39 and CD73 in immunity and inflammation

Trichinosis, also known as trichinellosis, is a parasitic disease caused by roundworms of the *Trichinella* type. During the initial infection, invasion of the intestines can result in diarrhea, abdominal pain, and vomiting. Migration of larvae to muscle, which occurs about a week after being infected, can cause swelling of the face, inflammation of the whites of the eyes, fever, muscle pains ...

Trichinosis - Wikipedia

Albendazole, also known as albendazolum, is a medication used for the treatment of a variety of parasitic worm infestations. It is useful for giardiasis, trichuriasis, filariasis, neurocysticercosis, hydatid disease, pinworm disease, and ascariasis, among other diseases. It is taken orally. Common side effects include nausea, abdominal pains, and headaches.
