disposal of high-level radioactive waste are technically proven.

Radioactive Waste Management | Nuclear Waste Disposal

...

High-level radioactive waste management concerns how radioactive materials created during production of nuclear power and nuclear weapons are dealt with. Radioactive waste contains a mixture of short-lived and long-lived nuclides, as well as non-radioactive nuclides. There was reportedly some 47,000 tonnes (100 million pounds) of high-level nuclear waste stored in the United States in 2002.

High-level radioactive waste management - Wikipedia
