Sometimes an IDE is not a feasible option. For example, making quick edits to a WordPress theme or plugin. Yes, I could copy all the code into an IDE, but then I have to open it up, paste it all in

there, set headers and all that other time wasting crap, when I'm just hoping for a quick edit.

Edit: @WickyNilliams has noted that setting display: block on a table body will strip the table of semantics and thus is not a good solution due to accessibility issues. I had good success with the solution proposed by @Serge Stroobandt, but I encountered the problem @Shevy had with the cells then not filling the full width of the table.
