Leaders and citizens are increasingly co-creating solutions to society's biggest problems. From prize-backed challenges to spur open innovation, to open data portals that provide programmable government-held information to the business community, we are seeing the beginnings of opening governance. The need for evidence on what works and how

Opening Governance

To create value in an open innovation context, firms need to increase the permeability of their organizational boundaries to enable knowledge exchange with a broad set of partners. Yet, in order to capture value, firms also need to consider how to govern their cooperative efforts and prevent unintended knowledge leakage.

Implications of Open Innovation for Organizational ...

The power of financial innovations to affect societies on global and intergenerational levels compels us to ask how we can ensure their responsible emergence in society. This requires an understanding of how innovation occurs and how it is governed in practice. Despite this, there is little research on the process and governance of financial innovation. The few studies conducted in this area ...
