Implementation of Shared Memory in C  
for Inter-process Communication

Introduction: As the name indicates  
Shared Memory means accessing a data  
stored at a memory location which can  
be shared among multiple processes.  
Hence, the memory at which data is

# Where To Download Interprocess Communications

located is accessible to one or more processes.

## **Interprocess Communication - Shared Memory with Linux in C ...**

Inter Process Communication is a mechanism which allows processes to communicate with each other and synchronize their actions. Whatever

# Where To Download Interprocess Communications

process is present in the system, they can communicate with each other. It is a method of cooperation. There are two types of processes -

## **Inter Process Communication In Operating System - Tutorialwing**

Inter process communication (IPC) is a mechanism which allows processes to

# Where To Download Interprocess Communications

communicate with each other and synchronize their actions. The communication between these processes can be seen as a method of co-operation between them. Processes can communicate with each other through both: Shared Memory; Message passing
