Adding more devices to your account Go to "Add Device", if you want to manage additional devices from the same account. Enter the serial number of the M2M's communicator which you want to add to this account and the login credentials that come with it's Quick Installation Manual (for new devices).

RControl App Guide - M2M's Tech Support
M2M devices have been using cellular carrier's Subscriber Identity Modules (SIM) chips that can be used to store and certify encryption keys. LoRaWan uses software-based encryption. Also, interoperability between LoRa devices is not guaranteed, as every OEM can implement the radio features of the standard in its own operating system.
