Many MikroTik's devices come with a built-in switch chip that can be used to greatly improve overall throughput when configured properly. Devices with a switch chip can be used as a router and a switch at the same time, this gives you the possibility to use a single device instead of multiple devices for your network.

MikroTik Routers and Wireless
MikroTik Neighbor discovery protocol is used to show and recognize other MikroTik routers in the network, disable neighbor discovery on all interfaces, /ip neighbor discovery-settings set discover-interface-list=none Bandwidth server. Bandwidth server is used to test throughput between two MikroTik routers. Disable it in production enironment.

Manual:Securing Your Router - MikroTik Wiki
Summary. Winbox is a small utility that allows administration of MikroTik RouterOS using a fast and simple GUI. It is a native Win32 binary, but can be run on Linux and MacOS (OSX) using Wine. All Winbox interface functions are as close as possible mirroring the console functions, that is why there are no Winbox sections in the manual.
