Ensure adequate water supplies in a fire emergency with guidance in NFPA 291.

## **NFPA 291: Recommended Practice for Fire Flow Testing and ...**

The current method of testing hydrants described in NFPA 291 is

the Main Capacity Flow Test, while an excellent means of determining the water supply available in the underground main, it does not necessarily confirm the proper functioning or flow rates of the hydrants used in the test.

### **NFPA 291: Recommended Practice for Fire Flow Testing and ...**

NFPA 291 is a “recommended practice;” thus, its color chart is not enforceable unless a jurisdiction determines that it is. Many municipalities and fire departments choose to follow NFPA strictly, others use some of the recommendations but make exceptions, and there are some areas that create their own unique color code.
