Modified sine wave off-grid inverters are a perfect choice if you are putting together a DIY emergency solar kit, or a cabin with modest electrical needs. Any more modern electronic loads like a HD television, or something with a high electrical surge, likely aren't good choices for modified sine wave inverters.

An inverter/charger cannot replace the solar charge controller, since inverter chargers can only manage the battery charging through an AC power source – an AC generator (e.g. a diesel one), the utility grid (for residential solar panel systems) or the shore power (in case of mobile/marine off-grid solar panels systems).

This is a scenario we use in off-grid design when the solar must be located over 20m from the battery store or the power demand is large in the daytime when the sun is out. This is the most efficient way to use the power. Sunstore has a selection of grid-tied inverters and off-grid inverters suitable for any use.
