Publication history Advanced Dungeons & Dragons 2nd edition (1989-1999). Eilistraee was first detailed in Ed Greenwood's The Drow of the Underdark (1991). Before being detailed in published material, Eilistraee already existed in Ed Greenwood's original Forgotten Realms. When asked to create more drow deities, the author used this opportunity to make the Dark Dancer official.

Natural selection is the differential survival and reproduction of individuals due to differences in phenotype. It is a key mechanism of evolution, the change in the heritable traits characteristic of a population over generations. Charles Darwin popularised the term "natural selection", contrasting it with artificial selection, which in his view is intentional, whereas natural selection is not.
