Medicine is the science and practice of caring for a patient, managing the diagnosis, prognosis, prevention, treatment, palliation of their injury or disease, and promoting their health.Medicine encompasses a variety of health care practices evolved to maintain and restore health by the prevention and treatment of illness.Contemporary medicine applies biomedical sciences, biomedical research ...

Medicine - Wikipedia

Homeopathic medicines are prepared by successively diluting the supposed active substance in a water and alcohol solution, and their claim is that the more dilute a medicine, the more potent, even if it the dilution passes the Avogadro point for molar solutions so that there is in all probability, or in fact, not even one molecule of the active substance left. According to homeopathy, nothing ...

Philosophical Debunking (Part 1) - 3:16

Introduction. The coronavirus disease 2019 (COVID-19) pandemic, a public health emergency of international concern, had affected more than 8.1 million cases and caused over 440,000 deaths globally by June 18, 2020 ().People of all ages can be infected, whereas older people and those with underlying diseases were more likely to develop severe illness (2, 3).
