Unfortunately, some symptoms of SAD can be misinterpreted as ADHD symptoms, and it isn't until outward behaviors—such as weight loss, sleeplessness, or refusal to attend social settings—that the social anxiety becomes more apparent. As a result, SAD often goes undiagnosed in those who also have ADHD.

ADHD and SAD Treatment and Symptoms - Verywell Mind

The silent treatment usually goes hand in hand with stonewalling – another destructive communication tactic that involves ignoring another person. You can even say that the silent treatment is a more extreme form of stonewalling. Stonewalling is a refusal to communicate when the discussion becomes too uncomfortable or overwhelming.
