SUPER SIMPLE ROUTER LIFT (DIY)

When we invented the router lift in 1999, little did we know that it would create a whole new category in woodworking and that it would be credited as one of the top innovations in our industry in the past 25 years. Since we invented the category, we are determined to build the best quality products available.

Router Lifts, Tables and Accessories - JessEm Tool Company

This shop-made router lift has always been a popular project with visitors to the website. The construction is relatively easy and the benefits in the shop are huge. If you have ever checked the price of commercially made lift you will certainly appreciate this project. The recent update allows the plan to be printed using a large format printer without any distortion.

Shop-made Router Lift | 3D Woodworking Plans

A router lift is essentially a router-table mounting plate with an attached carriage that holds the router. A removable crank handle inserts into the mounting plate and turns to raise and lower the carriage with incredible precision. A dial built into the plate or fastened onto the crank measures height adjustments in 1/64-in. or finer increments.

Router Lifts | Popular Woodworking Magazine

The lift replaces the standard insert plate in a router table (the 3/8" x 9 1/4" x 11 3/4" plate fits all Kreg® router tables plus many popular brands) and accepts any of 20+ popular router models—without the need adapters or modifications—in a high-performance carriage that you raise and lower from above the table.

Precision Router Lift | Kreg Tool

But thanks to this free router table plan you can build a table and a router table lift with some unique features. One of the most unusual things about this router table is that router lift mechanism which allows you to change bits quickly by opening the hinged top.

49+ DIY Router Table Plans [Free] - MyMyDIY | Inspiring ...

A router lift makes working at the router table so much easier. Bit height adjustments and even bit changes can all be handled from above the surface. The thing is most commercial lifts cost way more than the router it holds, but with our plans, you can build your own router table lift for about \$50.

Shopnotes #121 Router Lift | Router lift, Woodworking ...

Instead I will be building a wall mounted router table. Obviously I need to build the lift before the table so I went with the design that has worked for me in the past. It's John Heisz's homemade router lift design from [ibuildit.ca](#). You can purchase a set of plans by [CLICKING HERE](#). It's well worth the price.

Homemade Router Lift Number 3 | Jays Custom Creations

This router lift came to be because the designer needed to create router lift plans to meet client demands. According to him, these router lift plans would be suitable to mount their table saw extension wing or their table design. This router lift was designed to fit on any table. A link to its details is embedded within the tutorial.
