Solutions!

Rudin's Real and Complex Analysis is an excellent book for several reasons. Most importantly, it manages to encompass a whole range of mathematics in one reasonably-sized volume. Furthermore, its problems are not mere extensions of the proofs given in the text or trivial

We will assume here familiar computational facts about the real numbers, including the existence of a real number $\sqrt{2}$, though Rudin does not formally introduce the real numbers till several sections later. (a) By rationalizing denominators, get a non-fractional formula for $1/(\sqrt{2}+1)$. Deduce that if $x = \sqrt{2}+1$, then $x = (1/x)+2$.
