Ducks Unlimited Waterfowl Migration Map & Hunting Reports

The migration starts with the first rainfall of the wet season. This is usually in October or November, but can sometimes be as late as December or January. Red crabs all over the island leave their homes at the same time and start marching towards the ocean to mate and spawn. Male crabs lead the migration and are joined by females along the way.

Red crab migration | Christmas Island National Park

The Annual Migration To The Ocean. At the beginning of the wet season (usually October / November), most adult Red Crabs suddenly begin a spectacular migration from the forest to the coast, to breed and release eggs into the sea. Breeding is usually synchronized island wide.

Christmas Island Red Crab Migration | Christmas Island

These "community scientists" capture monarchs throughout the migration season, record the tag code, tag date, gender of the butterfly, and geographic location then tag and release them. At the end of the tagging season, these data are submitted to Monarch Watch and added to our database to be used in research.

Monarch Watch Monarch Tagging Program

The Missouri Department of Conservation hosted 13 public workshops to gather hunter input about duck season dates and zone boundary locations. Participants had the opportunity to review long-term data about weather, migration, habitat use, harvest, and hunter opinions, and to discuss their season date and zone preferences with other hunters and ...

Australian Skilled Immigration Points Requirements ...

Climate change threatens to disrupt the monarch butterfly's annual migration pattern by affecting weather conditions in both wintering grounds and summer breeding grounds. Colder, wetter winters could be lethal to these creatures and hotter, drier summers could shift suitable habitats north. WWF's 2013 report from Mexico showed that the ...
