But the question remains: "Why did the calf, or for that matter, the cow or bull, die?" For cows, a loss of less than 1 percent would be a good goal, and for the bulls, it's zero percent. Death loss goals are contingent on a reasonable culling rate, assuring that bulls and cows are marketed as market beef, not culls.

### **BeefTalk: Why Did the Calf Die? | Drovers**

You need to feed your Cow Plant in order to keep it from dying. Trying to feed it when it isn't hungry won't work; the Cow Plant will refuse the meat your sim offers it. It will only eat after it has stuck its cake tongue out. After that, if you wait long enough not to feed it, you will have a cool skeleton instead of a killer plant.
